## IF INTERVENTION IN MEXICO SHOULD BECOME NECESSARY, PLANS LONG MAPPED OUT BY WAR COLLEGE WOULD BE USED

If it should become necessary for the United States to pacify and police Mexico, the plans of operation are all mapped out by the war college at Washington. According to these plans, there would be two main troop movements into Mexico. One would be through Texas and into Mexico wholly by land. The second would be over sea to Vera Cruz and from there inland. This second movement, to insure success, would need at least 100,000 men. The proposed movements are shown by arrows on the map.

## STEADY GLASS MARKET SEEN

Ahead by Jobbers Who Welcome the Advance Made in Prices of Glass.

PITTSBURGH, March 18.—The Glassworker says: Last week's latest advance in window glass prices was welcomed by jobbers and many throughout the trade who can see nothing but a steadily advancing market ahead, but virtually might as well not have been made as far as any good resulting to the hand plants. These, without exception, are so heavily loaded with accumulated orders, many of them still at November quotations, that they will hardly get their heads above water before the end of the blast. For the time being slight effort is being made to sell hand made glass.

The Johnston Brokerage Company in a circular letter issued March 10, announces that it is temporarily out of the market, as follows: To the Trade: You are hereby advised that present discounts are withdrawn. Matters have been greatly confused at the factories and in our own office for the last sixty days owing to the very large amount of business process of handling and in the factories unsettled as to policy, we will have to remain out of the market temporarily until we ascertain just how much glass our factories will have to offer in excess of their present contracts before closing down at the end of the blast.

The closing period is not far distant, and as factories are sold far ahead and do not wish to enter into contracts that would be embarrassing or that the factories and ourselves would have difficulty in filling. Just as soon as we can get this information from our plants, we will give you the information with new discounts.

## PERSHING

(Continued from page 1.)

This was stated at the White House and war department Saturday after the receipt of a report that General Gaviro, the Carranza commander at Juarez, had given notice that General Pershing's troops would not be allowed to occupy Casas Grandes or other towns.

It was declared by administration officials that the pursuit of Villa being entirely a punitive expedition, had none of the characteristics of an invasion and that there was no object in occupying towns or cities because the American troops will keep constantly on the move.

Officials said Saturday that the situation at Tampico, where uneasiness is said to exist among Americans and other foreigners, had no bearing on the pursuit of Villa. Reports received at both the war and state departments continued to be optimistic.

Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, O.
